QT Power Chain® II Carbon Belt Drive System Outperforms Roller Chain
TB Wood’s QT Power Chain II Carbon belt drive systems are designed for use in a variety of industries including:

- Lumber
- Pulp & Paper
- Packaging
- Food Processing
- Bottling
- Aluminum & Steel
- Petrochemical
- Sand, Gravel & Concrete
- Glass

These high performance drive systems are specifically designed for tough applications such as:

- Belt Conveyors
- De-barkers
- Dough Mixers
- Scrap Cutters
- Compressors
- Bucket Conveyors
- Grinders
- Carton Sealers
- Dryers
- Screw Conveyors
- Pumps
- Palletizers

**QT POWER CHAIN® II CARBON BELT DRIVE SYSTEMS**

**OUTPERFORM AND OUTLAST STANDARD ROLLER CHAIN – AT A LOWER OVERALL COST.**

TB Wood’s QT Power Chain II Carbon synchronous belt drive system is the optimal choice for high performance and life cycle value in a wide variety of high-torque drive applications. When compared to standard roller chain, this powerful belt drive system provides important performance advantages and significantly reduces overall costs for end-users.

**The Costs of Roller Chain Add Up Fast:**

- Lubrication system equipment and maintenance
- Lubricant cost and disposal
- Lubrication contamination of product
- Frequent retensioning of “stretched” chain
- Expensive drive enclosures/noise guards
- Broken chain replacement
- Worn sprocket replacement
- Regular maintenance downtime
- Safety issues
- Extensive cleaning required during/after maintenance

**QT Power Chain II Carbon Advantages Over Roller Chain:**

- Belts outlast roller chain 3-to-1
- Sprockets outlast roller chain sprockets 10-to-1 or more
- Maintenance free system
- Minimal or no downtime
- No lubrication
- No expensive oil baths
- No retensioning
- Accurate and precise — no chain slop
- Quieter operation
- Minimal vibration due to chordal action
- Resistant to chemical and contaminants
- Excellent shock load resistance

**Power Ratings**

This is the optimal choice in meeting your needs for low-speed (below 500 RPM), high-torque drive applications. The QT Power Chain II Carbon belt drive system will transmit positive power over a wide range of loads, while withstanding power surges and shock loading.

Many QT Power Chain II Carbon belt drive systems have equivalent capacity to roller chain drives in the same width.
QT Power Chain II Carbon belts and sprockets have increased power ratings (on average of 33%, with maximum of 46% higher) than QT Power Chain II. This allows drive systems to be designed in widths narrower and more compact than ever before. Many QT Power Chain II sprocket hub sizes are identical to standard roller chain sprockets. With over 51,500 drive combinations to choose from, you can take advantage of QT Power Chain II Carbon benefits by replacing roller chain drives, particularly in, but not limited to, roller chain sizes from #35 through #120.

The body and teeth of QT Power Chain II Carbon belts are made of a durable polyurethane compound, specially blended for uncompromising adhesion to the tensile cords, plus the teeth are reinforced with a heavy wear-resistant nylon facing. This allows for exceptional tooth shear strength and excellent flex life. The belt gets its muscle from carbon-fiber tensile cords. It performs flawlessly under the harshest operating conditions, virtually immune to abrasion and chemical attack. The cords provide high impact strength to handle shock and surge loading. And with no metal-to-metal contact between belt and sprockets, sprocket life increases over roller chain sprockets by an even higher ratio – 10-to-1 more.

Replaces Roller Chain – Virtually Size For Size.

QT Power Chain II Carbon belts and sprockets have increased power ratings (on average of 33%, with maximum of 46% higher) than QT Power Chain II. This allows drive systems to be designed in widths narrower and more compact than ever before. Many QT Power Chain II sprocket hub sizes are identical to standard roller chain sprockets. With over 51,500 drive combinations to choose from, you can take advantage of QT Power Chain II Carbon benefits by replacing roller chain drives, particularly in, but not limited to, roller chain sizes from #35 through #120.

GET THE MOST FROM YOUR DRIVE SYSTEM WITH TB WOOD’S SPROCKETS AND BUSHINGS

QT Power Chain II sprockets utilize the Taper-Lock bushing system. This keeps the hubs narrow so the sprockets will fit on applications with short shafts. In addition, the left-justified hub design allows shaft mounting close to outboard bearings. This keeps the center of load dimension small, so overhung load values are as low as possible.
The Brands of Altra Industrial Motion

Couplings
- Ameridrives
- Bibby Turboflex
- Guardian Couplings
- Huco
- Lamiflex Couplings
- Stromag
- TB Wood’s
- Geared Cam Limit Switches
- Stromag

Electric Clutches & Brakes
- Inertia Dynamics
- Matrix
- Stromag
- Warner Electric
- Linear Products
- Warner Linear
- Engineered Bearing Assemblies
- Kilian

Heavy Duty Clutches & Brakes
- Industrial Clutch
- Twiflex
- Stromag
- Svendborg Brakes
- Wichita Clutch
- TB Wood’s
- Belted Drives

Gearing
- Bauer Gear Motor
- Boston Gear
